REMINDER TO ALL WATER/SEWER USERS: The farthest curb stop from the main will be considered the owner’s property and from that point, the owner shall be responsible for maintenance and repair. If water meter is damaged due to neglect, it will be the owner’s responsibility for the cost of repair and/or replacement by the Village of Glen Park.

Please do not put anything into the sewer system which is not biodegradable. We have been continuing to experience some problems with the sewer system. Your cooperation will avoid the unnecessary expense of repairs to the system. Please do not place any items over the sewer pot or meter pit, so that the Village DPW may access the system at any time for maintenance.

PUMP USE INTO VILLAGE SEWER SYSTEM
***** PLEASE NOTE *** SUMP PUMPS**

SHOULD NOT be used to pump liquid from your residence into the Village sewer system. When this is done, it creates a huge amount of sewage and thereby increases the cost of sewer to all residents. “The owner of the property from which the inflow originated shall be billed for the inflow at the rate per gallon (based upon the Superintendent’s estimated number of gallons of inflow) times 2 times the average charge per gallon charged by the Village of Brownville to the Village of Glen Park under their Sewer Service Agreement.”

WATER AND SEWER NEWS: The new water rates as of June 1, 2021 are \$25.00 for the minimum of 7500 gallons, over 7500 gallons the rate is 3.45 /1000, sewer rate is 3.75 times the total water usage and the DANC rate is \$33.84.
